**.decimal, Inc.** is a unique Internet-based manufacturer of custom, patient-specific devices used in radiation oncology. We have recently expanded our offerings by utilizing our Internet-based manufacturing approach to the aerospace and defense contract manufacturing markets. We specialize in utilizing our 3, 5, and 7 axis mill-turn CNC equipment on small-run, quick-turnaround, high-precision components. We believe our technology can add tremendous value to the aerospace and defense markets by reducing transactional costs and compressing procurement schedules.

As a medical device manufacturer, we are not only FDA compliant, but we also have the following Quality Certifications: ISO 9001, ISO 14001, ISO 13485, CE Mark, Japanese Foreign Manufacturer Certification. We are currently AS 9100 compliant and our goal is to be AS 9100 certified in 2010.

Based in Orlando, **Engineering and Computer Simulations (ECS)**

is a rapidly expanding software development company with a particular focus on the creation of interactive Virtual Worlds. Since 1997, ECS has produced computer-based simulations that involve a wide range of competencies and has provided virtual world-based services and technical support to a number of government agencies, most notably, the Department of Defense. ECS products and services enhance traditional methods of learning by offering clients modifiable, immersive virtual worlds that provide environments for integrating new technology, tools and information and simulated experiences that establish critical thinking skills and high levels of performance. ECS was selected by the U.S. Small Business Administration as the 2010 Florida Small Business of the Year. The ECS team possesses the technical expertise, business savvy and ambition to keep this company on the leading edge of computer-based simulation technology.
